Greetings,

Schools are the place to turn for qualified people for your future employees. Fruitport Middle School is looking for business and industry sponsors to help them continue this education through an after-school program called FIRST Tech Challenge.

FIRST Tech Challenge is where students learn skills in design, assembly, electronics, programming, OSHA safety, marketing and sometimes more importantly the soft skills; teamwork and high expectations. Fruitport Middle School's Robotics team is the quality team that our students need for their future.

Fruitport's FTC Team #11531, the Techno Trojans-Green, is entering its sixth year in the Middle School. We also added a second FTC Team #18092, the Techno Trojans-Blue last year to accommodate the increased number of students wanting to be involved. Last season was a rollercoaster dealing with the pandemic but in the end both teams earned a spot in the State Championship! The goal is to develop and grow students to be future members of the High School Robotics Team that has been involved in FIRST for over 18 years. One of those students from our very first FTC Team ended up winning the Young Adult Mentor for the State of Michigan for her work with our program last year. She is now attending her first year at Michigan Tech. Each year there are several reoccurring costs such as entrance fees for the competitions, new robot parts for this year's challenge as well as field pieces specific to this year's challenge. Because we are still a young team, we are also trying to build up our tools and spare parts. Our goal is to raise \$6000 this year.

Like most organizations, we hope to help prepare students for life in and after high school, but unlike most others, we are able to give students the chance to work with mentors from area industries in a process that simulates engineering and manufacturing in hands-on activities and high energy competitions. We serve a wide variety of students from Fruitport as well as home schooled students from around the area. For our High Schoolers FIRST becomes the cornerstone of their high school experience for many, and that nearly all of the students have gone on to have positive college experiences or apprenticeships.

I would like to ask your business to sponsor our team for the school year 2021-22. Please read the sponsorship guide provided and the perks with each level. Please remember all support you give the school is tax deductible and fits in all STEM based grants and incentives the state of Michigan offers.

If you would like to know more about FIRST, please take a look at the national website, <http://www.usfirst.org>. Thank you for your time, please call me at 231-2062760 if you have any further questions.

Sincerely,

Kris Cole, Coach

positively impact their world*

# Sponsor Donations

Bronze (\$50-\$99); company name will be displayed on team promotional video credits, Facebook, and webpage.

Silver (\$100-\$299); Bronze benefits plus your logo is displayed on our pit banners at competitions and public demonstrations throughout the year.

Gold (\$300-\$999); Silver benefits plus your logo will be displayed on the next Robot which is built Sept-Oct and on the back of the team's jerseys.

Titanium (\$1000+); All the Gold benefits plus your name and logo become part of the official team name which is read every time our robot goes into a match, which is over 10 times each competition day.

YES! I would like to help Fruitport Robotics at the following level:

\_\_\_\_\_ Bronze (\$50-\$99)

\_\_\_\_\_ Silver (\$100-\$299)

\_\_\_\_\_ Gold (\$300-\$999)

\_\_\_\_\_ Titanium (\$1000+)

Name: \_\_\_\_\_ Company: \_\_\_\_\_

Address: \_\_\_\_\_ City: \_\_\_\_\_ State: \_\_\_\_\_ Zip: \_\_\_\_\_

Phone: \_\_\_\_\_ E-mail: \_\_\_\_\_

Make checks payable to **Fruitport Middle School Robotics**. Please be sure to include your logo, if we are going to need it. Image files tend to work better, but high-resolution printed images will work as well.
